## DS 50 Zero Backlash Actuator

Flexibility is a key feature with the **DS 50 Zero Backlash Actuator** as it comes with the option to select the type of seals, gearbox output bearings and the type of performance.

The DS 50 is suitable for applications requiring high linear running at a low speed with high movement of the drive modules.

## AquaTRUE™ Planetary Gearbox

With IP66/IP67 and IP69K protection, the AquaTRUE™ Planetary Gearbox is able to withstand caustic cleaning chemicals and high pressure wash-downs thus eliminating the cost of additional components such as enclosers and shielding.

These features make this gearbox perfectly suited to harsh environmental applications such as food packaging, beverage dispensing, pharmaceutical, water jet cutting and medical hygienic equipment.

## Correct lubrication is fundamental to ball screw life

Opting for the correct lubrication is fundamental to **ball screw** life as it ensures the ball screw performs properly for its calculated life span. Both oil and grease offer corrosion protection, however lubricant choice can depend on the type of application.

**Which lubricant should you use for your ball screw?**

## Extra IQ – Gold Eagle HV Servo Drive

The **Gold Eagle HV** meets the highest level of motion control application requirements, providing top servo performance, advanced networking, built-in safety and high power density, combined with a fully featured motion controller and local intelligence.

This super compact, high voltage servo drive is designed, qualified, verified, manufactured and tested to withstand extreme environments.

## SHOW PREVIEW: Heason at DSEI 2017

Heason Technology will be exhibiting at **DSEI 2017**, the international exhibition of the defense and security industry, from **Tuesday 12th - Friday 15th September** at the **ExCel in London**.

On display will be a selection of motion control components from servo drives, through to slip rings and linear units. Also on show will be Atlas, our high-performance pan & tilt positioner, suitable for applications such as line of sight/beyond line of sight secure communications.

**Find us on Stand S3-102 for all your motion control requirements.**
