Ash Chury joins the Heason team

Heason Technology continues to expand with the appointment of **Ash Chury**, the new **UK and Europe Sales Manager**.

One of Ash's main objectives is to further develop the engineer-to-engineer assistance advantage that has helped to drive the Company's consistent growth in recent years.

Ash joins Heason with more than 25 years' experience in national and international technical sales management for engineered solutions in automation systems and motion control, with a résumé that embraces customer and project-level involvement as well as strategic business development.

Washdown Motors with "Lotus Effect" Coating Technology

Powerful, ready to install, washable: The new family of "Washdown Food" AKM™ drive motors are the ideal solution for most transport and rotation applications in the food, beverage and packaging industries.

Thanks to its unique waterproof "lotus effect" coating, liquids run easily off the surface of the ready-to-install drive units which result in a significant reduction in cleaning time and maintenance.

In addition, the motor-gear combination needs little power due to its high degree of efficiency and also offers more freedom

Onsite Product Demos!

Ever fancied having a product demonstration at your own premises?

Well now you can...Heason are running product demos so you have a chance to try before you buy!

For more information contact one of our Sales Engineers on +44 (0)1403 792 320

Variohm Holdings

Brings together the interests formerly owned by Roy and Joan Moffatt into a cohesive group. [Click here](#) to visit the Variohm Holdings website.

Variohm Eurosensur

The leading single source supplier of sensors and associated electronic systems since 1974. Visit the [Variohm website](#) for more information.

Herga Technology

The leading UK manufacturer, designer and exporter of footswitches, hand controls and sensing

when designing and constructing the machine because of its compact assembly.

Launched at this year's Interpack trade fair in Düsseldorf, Kollmorgen demonstrated the latest drive and control technology to overcome challenges in "Washdown Food" applications and achieve new levels of machine performance.

Visit the [AKM product page here](#) or call us on +44 (0) 1403 792 300.

New Thomson LC-Series Lifting Columns

Self-supporting and height adjustable these **LC-Series Lifting Columns**, available from Heason Technology, offer lifting solutions in a compact, pre-aligned package, perfect for medical and ergonomic applications requiring telescopic motion.

Benefits for Ergonomic Applications:

- High moment load capability for off center loading
- Multi stage telescopic design for different height operators
- Customisation of mounting plate for seamless integration to your machine
- Control offering to facilitate synchronous motion of multiple columns

New Thomson Lifting Columns offer an excellent extension to retraction ratio resulting in the maximum range of motion in a minimal footprint.

For more information visit our [website](#) or call us on +44 (0) 1403 792 300.

Windy500 2014 raises £10,000 for Julia's House

What a fantastic achievement!

Heason followed John Comben in his trusty Lotus, during his 16 day tour around Europe, and despite tackling wet weather and a few mechanical issues John managed to cover over **4,000 miles**.

To read back through John's adventure visit our [blog site](#).

If this event has inspired you to join the tour next year, raising money for a great cause, then keep checking the main [Windy500 website](#) for updates.

Examining the benefits of electric motion

With the wealth of **linear motion solutions** available today, it can be quite confounding to select a specific motion technology that meets performance requirements while satisfying budget and

solutions for medical equipment and industrial control applications. For more information visit the [Herga website](#).

[Ixthus Instrumentation](#)

Supplier of sensors, transducers and complete systems to measure displacement, force, torque and vibration. [Click here](#) to visit the Ixthus website

FUTURE EVENTS

[Exhibition Schedule](#)

Engineering Design Show 22/23 October 2014 - Stand E

DSEI Show 15-18 September 2015 - Stand TBC

Drives and Controls Show 12-14 April 2016 - Stand TBC

Keep a look out for all forthcoming events at Heason Technology on our dedicated [events page](#).

X-Y positioning and control solution

Heason have combined positioning mechanics, integrated stepper motor/drives and motion controls from two of its distribution partners to provide a unique range of **ready-to-run single-axis and X-Y positioning stages** that offer a modular motion system solution with reduced integration costs for a wide range of applications.

The cost-competitive range combines **Dover Motion's XY range of precision positioning tables** in a wide choice of travel, accuracy and stage configurations with **ABB's new and innovative DSMS series high-torque stepper motors** that include integrated micro-stepping drives.
