Bringing you the latest motion control news ...

AKD PDMM Motion Controller and Servo Drive

As a central, **multi-axis controller the AKD PDMM** combines all functions in a single compact device which delivers high performance in the smallest of spaces.

Reduce panel space, wiring costs and build time with an AKD servo drive axis, a multi-axis programmable machine and a motion controller all in a single package..

Slip rings for bottle labelling machines

Bottle labelling machines consist of rotating carousels equipped with guides along the perimeter.

The latter, thanks to either stepper or brushless motors, positions the bottles which have been placed on them in rotation.

Pan & Tilt Positioner for the Military Sector

Heason have recently designed and developed a **high-performance custom-designed pan & tilt positioner**.

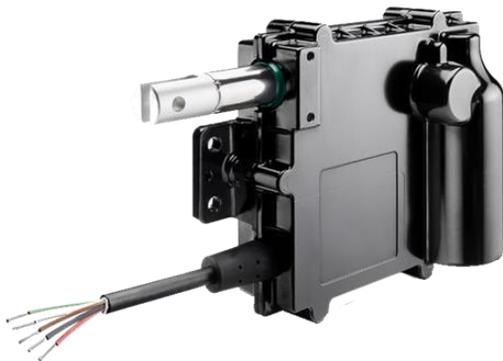

Following a detailed requirement analysis and prototyping phase, Heason's engineering team presented a bespoke positioning platform complete with integral motion controls

Optimised for its own use, the Atlas Platform is a durable and high-load capacity pan & tilt positioner housed in a **robust IP67- rated cast aluminium environmental enclosure** designed for harsh conditions.
