## September 2016: Your Motion Control News

Heason Technology has represented Kollmorgen in the UK since the mid-80s. For over thirty years our application specialists have assisted machine builders throughout the UK to successfully select, integrate, program and commission Kollmorgen motors, drives and controllers into hundreds of demanding applications. For the last **four years running** Heason Technology have been awarded the highly coveted **Gold-Partner status** in recognition of our success in terms of business as well as detailed technical and application knowledge.

2016 marks an important year for Kollmorgen as they are celebrating their 100-year anniversary - *a century of innovative solutions that have brought big ideas to life, kept the world safer, and improved peoples' lives ...*

### Actuators for Wash-down Applications

---

Linear slide guided **Movopart MG and Rapidtrak TG rod-less actuators** have a number of innovative design features to improve on performance and functionality.

These actuators can be purchased with stainless steel fixings and anodised aluminium, which offers wash down protection and multi-directional installation making this actuator ideal for hygienic applications.

**For further details on product specifications and features click below...**

### DS50 Zero Backlash Rotary Actuator

---

Flexibility is a key feature with the **DS50 Rotary Actuator** as it allows the user to select the seals, gearbox output bearings and type of performance required.

Combined with a TwinSpin high precision reduction gear together with a servo motor, the DS50 is suitable for applications requiring high linear and low speed, with high movement of the drive modules.

**Discover more details on the DS50 below...**

### Sensor Analysis in Action: Linearity Test Rig

---

Last year we commissioned an exciting development as part of our automated production testing regime with the introduction of a Linearity Test Rig for our range of Linear Position Sensors.

Designed and manufactured on-site here at Heason Technology this Linearity Test Rig is a cutting edge piece of Automated Test Equipment (ATE) used to assess the performance of sensors as they complete their manufacturing process.

**Take a look at the video below to see the Test Rig in action ...**

### See us at the Engineering Design Show 2016

---

Heason Technology are showcasing the best of breed motion solutions at this year's Engineering Design Show from **19th - 20th October 2016** at the Ricoh Arena, Coventry.

Ash Chury, UK & Europe Sales Manager, and Andrew Dowell, Regional Sales Manager, will be on Stand D50 to discuss your motion control requirements. Products on show will include drives, motors, actuators, gears and position sensors, plus a live product demonstration.

**Register for your FREE pass below or if you require more information please call us on +44 (0) 1403 792 300. We look forward to seeing you at the Show!**
